

# EDVIN ESHAGH

## VP of Software Engineering

Edvin is a seasoned entrepreneurial technology leader with extensive hands-on experience in all phases of the software development cycle. He has successfully built and managed software products and teams for several years, demonstrating a remarkable track record of delivering high-quality solutions that exceed customer expectations.

Throughout his career, Edvin has led self-motivated technical teams across a range of disciplines, including Engineering, TechOps, DevOps, Automation, and QA. He has developed an ability to balance his expertise in business and engineering disciplines to drive organizations in delivering world-class software products. This ability to navigate complex technical and business environments is one of the hallmarks of his leadership style.
